Placement Test Instructions

Talking Times Tables is a programme to teach the times tables by rote.

It is therefore most suitable for children who have poor recall of a times table when asked for the answers in order.

The placement test is simply all the times tables, written out in order.

Instructions

Ask children to complete all the times tables they know. If they don't know an answer, or haven't learned that table yet, it's fine to miss it out. There's no need to guess at answers they don't know.

Interpreting Results

Start the Talking Times Tables programme with the easiest times table that a child struggles over.
